

Data sheet TPX-D25.4-f67

Plano-convex TPX lens with diameter 25.4 mm and focal length 67 mm for THz application

Description

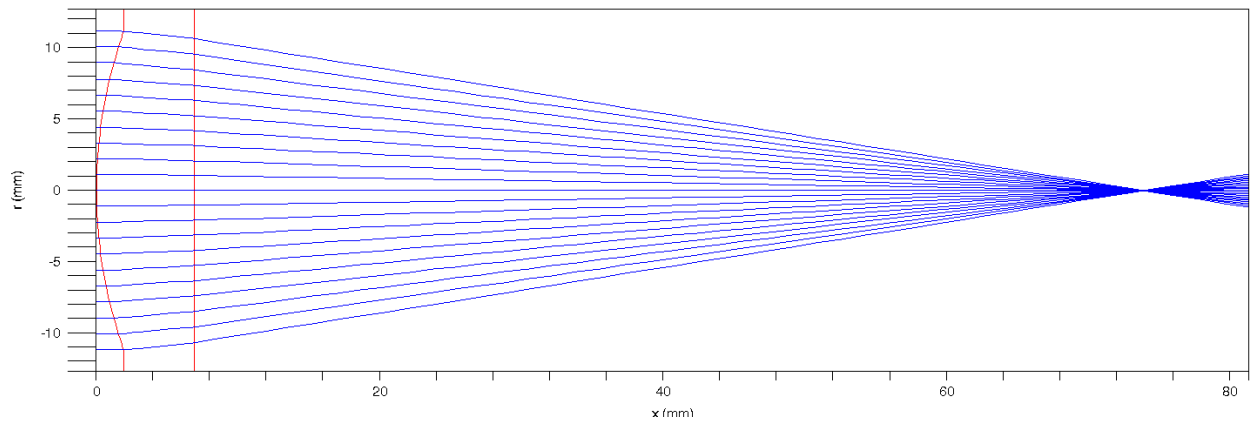

The TPX-D25.4-f67 is a plano-convex TPX (Polymethylpentene) lens for THz waves. It can be used to focus a collimated THz beam.

Lens parameters:	material	TPX (Polymethylpentene)
	refractive index n	1.45 @ 1 THz
	absorption coeff. α	0.3 cm ⁻¹
	focal length	67 mm (distance flat surface – focus)
	outer lens diameter	25.4 mm
	free aperture diameter	22.4 mm
	maximum lens thickness	6.94 mm
	edge lens thickness	5 mm
	aperture angle α	9 °
	numerical aperture NA	0.16

Airy disc diameter	$\nu = 300$ GHz	3.8 mm
	$\nu = 1$ THz	1.1 mm
	$\nu = 3$ THz	0.4 mm

Lens tube	outer diameter	30.5 mm
	length	12.7 mm (½") or 25,4 mm (1")

TPX lens 25.4 mm diameter, 67 mm focus length

Order information

Part number	Description	Photo
TPX-D25.4-f67-0	Unmounted TPX lens with diameter $D = 25.4$ mm and focal length $f = 67$ mm	
TPX-D25.4-f67-t12.7	Mounted TPX lens with diameter $D = 25.4$ mm and focal length $f = 67$ mm, tube length 12.7 mm	
TPX-D25.4-f67-t25.4	Mounted TPX lens with diameter $D = 25.4$ mm and focal length $f = 67$ mm, tube length 25.4 mm
